

# Cold Wrap

Cold therapy is an effective and soothing treatment for reducing post-operative pain and swelling.

EVERCRYO® cold wrap is built with isolated layers to reduce the impact of condensate water and the cold loss. Our gel pack is well designed for durability and safety. There are up to 12 cold wraps for your choice.

### Features

- Three-layer construction provides a comfortable cold therapy;
- High-performance not-toxic gel stays for a safe and longer cold;
- Double sealed and pvc-coated nylon exterior builds for a durable and leak-free pack;
- Anatomical design with elastic straps targets for a customized fit;
- Removable gel pack adds convenience for washing.
